**Subject:** M6H1HARVEYRESPONSE: Use of ASPECT for overflight of NPL Sites  
**Date:** Thursday, August 31, 2017 6:41:15 PM

---

Hi Nick

I know that ASPECT is tied up with Arkema right now, and this is the absolute top priority.

I have been approached by Superfund Remedial Management with a request to have ASPECT fly over the NPL Sites at some point to determine the level of accessibility to the Sites. The RPM teams would like to get out to these locations next week.

At this point, I am just inquiring about this possibility. I understand ASPECT is in the chain of command under your UC

I appreciate your input

Thanks  
Chris
